Unofficial Star Coin Guide (Big Coin) by swaggers for SuperCheats.com

Swaggers takes you through each individual level showing you exactly how to get each and every big star coin. Along the way check out his handy hints and tips for beating all the bosses, obtaining extra lives, finding all the secret exits, and general tricks to help you complete this game.

Star Coins: World 1-1

This is our Star Coin guide for World 1-1 in New Super Mario Brothers Wii. This level is your typical Mario Brothers above ground level and you can freely move about the level forwards and backwards as needed. The Powerups on World 1-1 are based on the Propeller. The Propeller will be your go to Powerup for most of the game and 1-1 is a quick level to come back to if you need a Propeller.

Star Coin #1 - Immediately past the Midway Flag will be a small hill that you can butt slide down to get 2 Goombas. At the bottom is a ? block, surrounded by 2 standard bricks, that will contain the first Propeller powerup. Grab this and then spin jump up to the visible Star Coin.

Star Coin #2 - Continue on the level ignoring the platform at the top of the level. Instead run along the bottom, past 2 small island sections with 3 bricks and 3 coins each, and then up a small hill to get to a rotating circle piece. This contains a warp pipe that we want to go down. If you have the Propeller suit you can just spin up there, if you don't you can wall jump. Wall jumping is jumping against a wall, then while holding towards the wall, hitting the jump button again to burst off the wall towards the opposite side. It can take some getting used to and this is a safe area to work on it. Don't miss the 1-UP as you come out of the pipe in the lone brick in this hidden exit.

Star Coin #3 - Immediately on exiting from the last Star Coin you go up a small hill with 2 little fences at the top. Propel yourself up to the top of the level onto a small ledge with a Koopa. The Star Coin is right there on the next ledge to the right in the open.

Star Coins: World 1-2

This is our Star Coin guide for World 1-2 in New Super Mario Brothers Wii. 1-2 is also home to an easy 1UP loop that I will point out. It can easily net you 5 Marios in a short period of time. This is an underground level.

Star Coin #1 - As soon as you go down the starting pipe the Star Coin is just ahead. Wait for the rocking rock formation to be at it's peak to jump up and get the Coin.

Star Coin #2 - You will come to the first Mario controlled girder in the game. You use the Wii Remote to rotate it on it's axis. Use this girder to get into the green pipe. There will be a sign below this girder pointing up. Once inside pop the 4 invisible bricks (2 to each side) and then pop the center brick to reveal a P-button. Hit The P-button to turn coins to bricks, and bricks to coins. Watch out for the lone Goomba. Then jump your way to the top to get the Star Coin.

1-UP Loop - Immediately on exiting the Star Coin you'll see a brick structure that only has a 1 brick high entrance and 4 coins in the middle. You need to run, slide under the entrance and then ground pound the bottom wall out. If you are small at this point the Midway Flag, with it's auto large Mario, is just up the level a bit. Grab it and comeback. Now that you have broken through the lower area hit the far right brick to release a Star. Now just blaze through the level killing everything and if you get all the Goombas, Koopas, and Piranha Plants on the way you'll get 5 Lives. You can exit the level and come back and do it as often as you like.

Star Coin #3 - You'll come to section with 2 Piranha Plants on each side and a big brick structure blocking a pipe. You can see the Star Coin below. Ground pound the bricks and enter the green pipe. In the lower section grab the POW block and throw it to release the Star Coin.

Star Coins: World 1-3

This is our Star Coin guide for World 1-3 in New Super Mario Brothers Wii. This guide will also show you the secret alternate exit that takes you to the Warp Cannon for World 5. Your first use of Yoshi is in this level and he's located in the middle of a triple ?-block just after the first Hammer Bro.

Star Coin #1 - Is in plain view right after you get Yoshi from the middle of the triple ?-block after the Hammer Bro. Use Yoshi's flutter jump by holding down the jump button. Yoshi will jump and then, jump a little bit more on his own. Easy Star Coin. You can also just Propeller Mario up there if you still have the Propeller Suit.

Star Coin #2 - Right after the Midway Flag Mario will come to a tight series of 3 pipes, then 2 pipes. There is a hidden area if you go into the side of the hill from on top of the 3rd pipe in the first series. This will actually get you into the first of the second group of pipes under the hill. Then do another Yoshi flutter jump to get the second Star Coin.

Warp Cannon to World 5 - Mario will immediately come to a yellow pipe with a Piranha Plant and a group of 3 square hills. Above these hills you'll notice a small outcropping on the top of the world. Jump up there. This is a hidden area with a lot of coins. But to get to the Warp Cannon we want to stay right at this first lip. Yoshi jump up and above the screen and then you need to jump off Yoshi with a flip of the Remote at the top of the jump to get above the level on the right. Follow this all the way to the right to enter a hidden pipe and find the secret exit.

Star Coin #3 - Just past this hidden area with the coins in a Star Coin in plain view. Wait for the Piranha Plant to go back into the tube and then use the red pipe as a jumping block to get the Star Coin.

Star Coins: World 1-Tower

This is our Star Coin guide for World 1-Tower in New Super Mario Brothers Wii and also tells you the perfect strategy for defeating Larry Koopa. Coming into this world with a Propeller Suit from 1-1 or the Red Mushroom House is going to make it a LOT easier.

Star Coin #1 - As you work your way up the level Mario will come to the first area where large stone move in and out of the side of the level. Once above this Mario will reach the second platform that is swinging on chains. Ride the platform to the left side of the screen and jump into the area with the Star Coin. If you miss it can go back down the right side and try again.

Star Coin #2 - The very next section will have 3 moving platforms. You need to jump off to the right where the Skeleton Koopa is. Then wall jump or propeller yourself into a hidden area in the ceiling. This contains the second Star Coin. If you miss this there is no way back down and you'll have to do the level again.

Star Coin #3 - Right after the Midway Flag you'll have a random powerup box. Above this is yet another swinging platform. This time we need to go to the right again and either Propeller up or wall jump up to a second swinging platform. The Star Coin is in here.

Boss: Larry Koopa - There is a powerup to the left of the entrance if you need it. Larry Koopa is going to do a basic straight line magic attack followed by a high leap. You just need to land on his head. Once you do he will go into shell mode and bounce back and forth on the floor 3 times. Then it's back to his same attack pattern. Hit him 3 times to defeat him.

Star Coins: World 1-4

This is our Star Coin guide for World 1-4 in New Super Mario Brothers Wii. World 1-4 is the first water level and we'll give you some basic hints and tips to remember as you go through. Ice Mario will make this level a lot easier and is needed to get some of the Star Coins.

Hidden Red Loop - Mario will swim past a small island with 2 red pipes coming out the bottom, then a T island, and then a large mass island. Freeze any of the many, many, many fish that are below you and use the icicle fish to get onto the T island. The Red Loop is on the T island. The coins are all in the water so watch out for the many, many, many fish.

Star Coin #1 - The first coin is just above a red pipe right after the Midway Flag. Freeze the red fish up with the Coin to make it easier to get.

Star Coin #2 - As you leave Star Coin #1 you'll pass a Clam with 2 coins inside and immediately come to a Sea Urchin above a ?-block and normal brick. We want to freeze the Sea Urchin as it's leftmost point and use it to jump to the right island mass above the water. Mario will swim past a small island with 2 red pipes coming out the bottom, then a T island, and then a large mass island. You want to get on this large mass island. Walk to the right and drop down onto the second Star Coin. Alternately, but much harder, you can freeze a fish under the Star Coin and ride the fish up to the Coin.

Star Coin #3 - As soon as you venture further from Star Coin #2 you will see the final Coin. Because of the water pressure flowing from the pipes this is not an easy coin to get. You need to Ice the Sea Urchin while it is over the pipe. This will cause the Sea Urchin to rise to the top and break. After a Sea Urchin breaks it free falls. Wait for it to fall over the pipe stopping the flow of bubbles and then swoop in to get the final Star Coin.

Star Coins: World 1-5

This is our Star Coin guide for World 1-5 in New Super Mario Brothers Wii. World 1-5 is in the clouds and to help you get the first Star Coin I recommend you enter this world at least as Mushroom sized Mario.

Star Coin #1 - You're going to want to start this level at least as mushroom sized Mario to make this first coin easier. Right away you will come to a section of 3 sets of bricks on separate loops. The one ?-block will be a Propeller Suit so grab then. Then right any of these loops to the top of the screen to find a platform. Slide jump under the leftmost of the 2 ?-blocks on this platform to reveal a Vine. Now climb the vine to get to the secret area. Up in the secret area you can either ride one of the 2 sets of ?-blocks to the top and fall through the Star Coin or Propel yourself up to it.

Star Coin #2 - Right after you get out of the pipe from the secret area you are going to jump onto a large rotating green cube. Next you will come to a lone Koopa on a small platform. Grab his shell and jump to the next large green cube to the right. Now as it start to dip to the right drop the shell on the Star Coin. Alternately you can butt slide down the cube into the Coin and then jump to safety OR you can free fall into the Coin and then Propel yourself to safety. Lots of options with this one.

Star Coin #3 - Mario will come to a series of small red rotating cubes. The final Star Coin is above the second flying Koopa. If you have the Propeller suit then simply fly up there and get the coin. If you don't you can use the Koopa as a jumping off point. Simply wait for the Koopa to be at his highest point and then jump off him to the Star Coin.

Star Coins: World 1-6

This is our Star Coin guide for World 1-6 in New Super Mario Brothers Wii.

Star Coin #1 - The first Star Coin is in plain site about a small fast rotating circle of land. Use the flying Koopas as a boost to get it.

Secret Powerup - Immediately after the first Star Coin will be 3 bricks. Hitting the center one with release a Vine. Climb the Vine to get to a random powerup block.

Star Coin #2 - The Secret powerup exit will land you right next to the second Star Coin. Simply jump over to the small platform its on. If you are trying to get this from below use the flying Koopas to get Mario enough height to reach the platform.

Star Coin #3 - When you hit the Midway Flag you should notice the telltale indentation of a hidden area below you. Use the momentum of the rotating circle to land yourself in this hidden area. Take the pipe down to the secret area. This area is a FAST moving rock circle mass with Goombas constantly falling from the pipes on the right. Work your way to the left platform to get the Star Coin and then exit the area FAST to keep from getting damaged.

Star Coins: World 1-Castle

This is our Star Coin guide for World 1-Castle in New Super Mario Brothers Wii and tells you our strategy for defeating Larry Koopa.

Star Coin #1 - Work your way through the spinning gears until you see the first Star Coin. Use the tall spokes on the gear to launch yourself into the first Star Coin.

Star Coin #2 - Just past the Midway Flag you will see the second Star Coin covered in blocks. You need to let the spiked block fall from the ceiling to break apart the blocks. Then let him rise before jumping in and getting the Star Coin. You have plenty of time to make it out right away but you are so safe from the falling block if you're worried about your timing.

1UP - Right after Star Coin #2 there are 2 large blocks flanking a stone structure with 15 coins inside. Jump to the top of this structure and the 1UP is hidden in the middle on the 2 coins.

Star Coin #3 - You are going to travel through some more spinning gears until you get to a large gear the size of the entire screen. There will be a green pipe in the bottom right of the screen. You need to ride the gear down below the red platform and then jump onto the pipe before getting killed by the lava. In this secret room hit the P-switch and then run across the new bricks to wall jump up to the Star Coin. Don't push your luck if you miss the jump the first time as the P-button will reappear to give you another chance.

Boss: Larry Koopa - There is a hidden powerup between the 2 standard bricks right before the door to Larry. Larry will fight you the same way. Throwing magic directly at you and jumping high. The change is that the floor is going to rise and lower in sections. I find this actually makes it easier on you as when Larry is in shell form he gets trapped in the low sections making it easy for you to be ready to pounce as soon as he is back in Larry form. 3 hits is the magic number to end this battle and finish World 1.

Star Coins: World 2-1

This is our Star Coin guide for World 2-1 in New Super Mario Brothers Wii. This level introduces the sand spouts. As long as the sand is flowing it is safe to stand on and will push you to the top of the sand. Watch for the small puff of sand at the bottom of the screen to show then a new spout is about to explode.

Star Coin #1 - Pretty quick into the level you'll see the first Star Coin hanging out above a sand explosion. Just wait for the sand to start flowing and ride it up to the Star Coin and then jump to the platform for safety.

1UP - The very next area has a sand explosion between a Koopa and a normal brick. Grab the Koopa shell and wait for the sand to be at it's peak. Then throw the shell at the brick to release the 1UP!

Star Coin #2 - After the Midway Flag you'll come to a Piranha Plant over a Star Coin. Jump over the Piranha Plant to the sand then walk off the left side to drop down to get the Star Coin. Wait for the sand to start back up to get out of the area.

Star Coin #3 - You are going to come to a series of 3 spouts of sand with a flying Koopa overhead. You'll see the Star Coin down and to the right. You need to drop the Koopa on one of the sand sprouts to grab his shell. Then from the sand spout closest to the Coin throw the shell off the right side into the Coin. If you miss or you drop the Koopa into the abyss instead of the sand you can progress forward and then come back to see the Koopa re-spawned. If you are having a lot of trouble with this one you can bring a Propeller Suit into the level and make it all the way here and then jump and hit the coin and immediately propel yourself out of danger to one of the sand spouts. Good luck either way.

Star Coins: World 2-2

This is our Star Coin guide for World 2-2 in New Super Mario Brothers Wii. This will be the first time you encounter the guys who pull spiked balls from their mouths and throw them at you. You need to avoid the balls but you can kill the enemy by landing on their head. Just be careful that they are not already in the act of getting another ball.

1UP - Mario will come to a large elevator that contains a TON of Koopas. If you start one of their shells moving and avoid getting hit for the entire ridge the last Koopa at the top with reward you with a 1UP. Then follow the shell to the left where it will hit a brick to give Mario a powerup.

Star Coin #1 - Right after the large Koopa elevator and immediately before the Midway Flag is a sand pit. Jump in and ride it a LONG way down to a secret area. Hit the P-switch and then rock up the blue coins on the way down. You can wall jump a couple times to maximize coinage. Enter the green pipe at the bottom. In this second secret room hit the ?-switch to spawn some platforms. Work your way up the platform being careful of the spiked balls and grab the Star Coin. Then exit via the green pipe launcher

Star Coin #2 - Mario will soon see a rising and lowering sand platform with 3 brick to it's left along with an enemy. There are also some barrels to the left on a platform. Hit the leftmost brick to reveal a Vine. Ride the moving platform getting yourself a TON of coins until you get to a POW block. Grab it and hold onto it until platform in under the Star Coin. Then toss it to bring the Star Coin down on your platform where you can get it.

Star Coin #3 - Mini Mario time. From where you drop from above head LEFT past the spiked ball guy to a series of moving platforms. You need to head left into the Green pipe. Grab the Mini Mario Mushroom from this secret area in the ?-block and then head back to the surface. You need to head RIGHT now to the second set of moving platforms. There will be a small green pipe with 2 barrels in front of it. Throw these barrels and enter the pipe. Run along the water, then wall jump up to the Star Coin.

Star Coins: World 2-3

This is our Star Coin guide for World 2-3 in New Super Mario Brothers Wii. This is the first Dark level. There are light sources directly around Mario and certain elements but most of the level is pitch dark. Be careful.

Random Powerup - You will pass by 3 Fire Piranha Plants and then there will be a step area with 2 pipes. Go down the first pipe to enter a secret area with a random powerup block.

Star Coin #1 - Head through the level until you pass 2 pyramids built with large yellow blocks. The 3rd pyramid will have a Star Coin on the bottom level. This 3rd pyramid is directly after a stone area you have to jump over that has a Mini Mario path through its base.

Star Coin #2 - After the Midway Flag you'll come to a Fire Bros. Kill him and then head back LEFT along the bottom of the level to reach the second Star Coin.

Star Coin #3 - You come to 2 GIANT Piranha Plants. There will be a small rising and lowering platform that you can jump on. Get on the platform and then jump to the right section with the Piranha Plants on the ceiling. Take this to the right to a hidden area with the final Star Coin.

Star Coins: World 2-Tower

This is our Star Coin guide for World 2-Tower in New Super Mario Brothers Wii and covers our strategy for beating Roy Koopa.

Secret Room - After passing the first two fake doors you will come to a skeleton Koopa below 2 ?-blocks. The left most is a powerup. Just to the left of these 2 ?-blocks in a platform and then wall to it's left is fake. Head in there for a random powerup.

Star Coin #1 - As you climb you'll see the first Star Coin on the left side. You need to climb up the right side and then switch to the left. Use the gates to climb down and get the Star Coin. Don't worry if you fall, you can climb right back up.

Star Coin #2 - Right at the Midway Flag lead to the left and the bottom right section is a hidden area with the second Star Coin.

Star Coin #3 - Mario will come to a stepped area with 3 skeleton Koopas. The star coin is above this to the left on a grate that has spikes at the top. Watch the spikes and grab the Coin.

Boss: Roy Koopa - Roy ground pounds. This will stun you if you get caught by it so jump as Roy comes down. Preferably on top of his head. Same as always, 3 hits and he's done.

Star Coins: World 2-4

This is our Star Coin guide for World 2-4 in New Super Mario Brothers Wii. This level has extreme wind conditions that will will push you to the left. You can use this to your advantage to make some pretty big jumps and you'll need to use it to reach some of the coins and also to get to the secret exit. You will also need the Propeller Suit for the secret exit and 2 of the Star Coins.

Star Coin #1 - You'll come to a green pipe followed by 2 Koopas pretty quick. Click the rope ladder here and then jump up to the top of the left section. There is a hidden vine at the top middle with 2 hidden coins brick flanking it. The vine is above the highest single brick. There are a TON of hidden coin brick here which will force you on a path to climb the vines to get to the Star Coin.

Star Coin #2 - After the Midway Flag there is a green pipe directly below a sign pointing the left. Jump down here when the wind dies down. You need to be Propeller Suit Mario for this coin! Jump down and as soon as you hit the coin activate the Propeller to push you back up the other side.

Star Coin #3 - You'll come out of this area in a red pipe and there with be a sign point up and to the right. Ignore the signs advice and head down the hill carefully and to the small platform. When the wind picks up, jump with the wind and then Propel at the last second to hit the Star Coin and fly up to safety.

Secret Exit - Just past this you will come to a floating section with a sign on it pointing to the right and a hard top enemy. Wait on the far right edge until the wind picks up and then jump propel Mario into the high right wall. Wall jump and the wind will push you over the top into the secret area. Then ride the cloud up to the background cloud in the sky to reveal the first Star Coin. It's just up and to the left of the palm tree.

Star Coin #2 - Mario will come to a section where a Piranha Plant is down and between sets of Yellow blocks. Have Yoshi eat one of the spiked enemies and then spit it out at the Piranha Plant and then enter this area and use the Yellow blocks to go to the right of the plant. A group of 3 coins will appear to show you where to drop down. The coin is hidden in the dark in the middle top section of the area. Kill or dodge the Fire Piranhas to get it.

Star Coin #1 - The first Star Coin is directly on the path of the pink rotation cube. Simply spin jump up there to get it.

Star Coin #2 - Mario will quickly come to a section of 4 sets of 4 blocks swaying back and forth. There is a green pipe at the top of this section. If you lost your Propeller Suit you can use the Propeller Blocks to reach the Star Coin at the top of the screen.

Star Coin #3 - After the Midway Flag you will ride another pink rotating cube. The Star Coin is out in the open for Mario to grab with his Propeller Suit.

Secret Exit - This one can be tough and requires a Propeller Suit. At the end of the level is a hidden pipe at the top of the screen. Star Coin #2 - Right below the Midway Flag is the next coin. You can make the jump over to the coin and on top of the pipe as Normal Mario but it's alot easier to Ice the Piranha Plant as it exits the pipe and use him as platform to get the Star Coin.

Star Coin #3 - After doing all the jumps you'll come to a pipe that is blocked off by a brick. Slide in as the Penguin and go down the green pipe. You need to freeze a sliding penguin and ride him to the Star Coin. Make sure to duck to get under the small area and jump at the right time to avoid falling to your death.

If you have mad jump skills you can chain all of these Bullet's into 1UPs. The easiest way to get this Star Coin is to chain jump the first 2 Bullet Bills and then Wall Jump to the Star Coin. It might take you some time but you can do it as small Mario just fine.

Star Coin #3 - As you come out you'll be right by a rising and lowering platform with an Ice Bro on it. Kill him to get to the top ledge. You'll see the Star Coin to the right.
